

Comprehensive Compliance Monitoring and Enforcement Report

Report run on: October 15, 2021 12:27:51 PM EDT

Version 6.0

User Selection Criteria

Location: NEW JERSEY

Handler ID: NJR000044776

Evaluation Date Range: From: 10/01/1990 To: 10/15/2021

Report Results

Number of Handlers: 1

Number of Pages: 4

Report Description

This report provides a complete listing of evaluation, violation and enforcement activities for each handler, including all orphan records. Below the handler id information, the data is presented in three sections; evaluations, violations and enforcements. Notes are provided in each respective section.

3007 Information Requests that are not linked to an evaluation will appear below the handler universe information. 3007 Information Requests that are linked to an evaluation will appear below the evaluation information within the light blue section.

CEI Evaluation	06/30/2021	Activity Location:	NJ	By:	STATE	Identifier:	001	Person:	SOSG	Suborganization:	Found Violation:	NO
NOC Date:		Citizen Complaint:	NO	Multimedia Inspection:	NO	Sampling:	NO	Not Subtitle C:	NO	Day Zero:	06/30/2021	Focus Area:
Eval. Notes:	A standard compliance inspection was conducted at Gulf Oil Company Linden Terminal (Gulf). Gulf is a transfer terminal for gasoline. Gulf generates Very Small Quantity Generator (VSQG) amounts of non-acute hazardous waste from the daily operations of a fuel transfer station. Small amounts of hazardous waste (D001) are generated from routine maintenance of the vapor recovery system which is accumulated in a satellite accumulation container near the unit. On occasion Gulf generates LQG quantities of hazardous wastes from tank clean-outs of flammable liquids & solids (D001), and the removal of leaded paint (D008) from tanks during tank maintenance. Because of this, Gulf maintains compliance with all the LQG generator requirements. At the time of this inspection there was no hazardous waste on-site. All applicable paperwork was reviewed, including their 2019 Biennial Report, and found to be in compliance. The Bureau's compliance assistance package was reviewed. Stewardship outreach was also conducted. The last hazardous waste (RCRA) inspection was conducted on 15 February 2018 with RCRA violations. No RCRA or universal waste violations were noted during this inspection.											

No Linked Violations

Eval. Notes:	Gulf Oil Company Linden Terminal (Gulf) is a transfer terminal for gasoline. According to John Lamparella, the Terminal Manager, gasoline arrives at the terminal via pipeline and is stored in tanks and then loaded onto tanker trucks for delivery to gas stations. Small amounts of hazardous wastes (D001) are generated from routine maintenance to the vapor recovery system which are accumulated in a satellite accumulation container near the unit. The facility is almost always a Very Small Quantity Generator (VSQG) of hazardous waste, but on occasion Gulf generates LQG quantities of hazardous wastes from removal of leaded paint from the tanks for tank maintenance (D008). Because of this, Gulf maintains compliance with all the LQG generator requirements. We discussed the new episodic event option offered under the generator improvements rule, but Mr. Lamparella was unsure if they would always be able to complete the work within the 60-day time frame, so he plans to just maintain LQG compliance for the facility.											

No Linked Violations

Note: Penalty information associated with an enforcement action is reported with the enforcement action. For enforcement actions associated with multiple violations, the penalty information will be reported with each violation, however, the penalty is only assessed once, regardless of the number of violations associated with the enforcement.
